DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21, drawn to a composition, classified in class 424, subclass 78.02.
- II. Claims 22-24, drawn to a method, classified in class 424, subclass 78.02.
- III. Claims 25-26, drawn to a method of manufacture, classified in class 424, subclass 78.02.

2. Inventions I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the composition can be made in another materially different process, such as using water, organic amine, or polyhydric alcohol as a solubility promoter.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product can be used in

a materially different process, such as inhibiting the generation of malodour or delivering enhanced fragrance.

Inventions II and III are related as process of making and process of using the product. The use as claimed cannot be practiced with a materially different product.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group III, restriction for examination purposes as indicated is proper.

3. Claim 1 generic to a plurality of disclosed patentably distinct species comprising a monohydric alcohol carrier fluid, and a solubility promoter selected from the group consisting of water, organic amine, polyhydric alcohol, volatile propellant, and any combination of the listed. Claim 19 also contains a plurality of disclosed patentably distinct species, namely organic amine, organic amine and polyhydric alcohol, organic amine and volatile propellant. Applicant is required under 35 U.S.C. 121 to elect single disclosed species for claim 1 and claim 19, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1616

4. A telephone call was made to Matthew Boxer on July 16, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert M. DeWitty whose telephone number is 703-308-2411. The examiner can normally be reached on 9:00am - 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jose Dees can be reached on 703-308-4527. The fax phone number for the organization where this application or proceeding is assigned is 703-308-7924.
